OVERVIEW of TBI

Traumatic Brain Injury, or TBI, is a leading cause of death and disability in the U.S. today. Approximately 166 Americans die each day from TBI-related injuries.

TBI is an injury caused by a blow, jolt, or penetrating object that disrupts normal functioning of the brain at any age. TBI can result in serious damage to the brain that can lead to long-term complications and death. CDC reports that more than 2.8 million U.S. people sustain a TBI each year; of those, more than 55,000 die and more than 280,000 are hospitalized.
