# Reflections

## Dear HIPRC Community,

I want to take this opportunity to share my gratitude for the University of Washington (UW) Harborview Injury Prevention & Research Center (HIPRC) community. The work that you do contributes to our shared goals to prevent injury and violence and improve equitable care and outcomes for those who have been injured.

At the HIPRC, we collaborate across disciplines, in our local communities, across the WWAMI region, across the country, and across the globe. We center the voices of those most impacted by injury and violence in our work. Our commitment to community engagement and equitable injury research serves as the foundation for the innovative and impactful contributions that we highlight in this annual report.

As I reflect on the past year at the HIPRC, I am excited about the direction of the Center. The HIPRC has been a leader in injury prevention and injury care research for over 40 years. We continue to serve critical roles in community service, research training, and in efforts to achieve injury-related health equity across the country. As so many across the country and world continue to experience harm from injury and violence, the importance of our mission has never been more clear.

This past year, we received a \$4.3 million grant from the Centers for Disease Control and Prevention (CDC) to support research on preventing opioid overdose, adverse child experiences, school violence, and older adult falls. This five-year grant places UW HIPRC amongst 11 other Injury Control Research Centers (ICRCs) in the United States and distinguishes it as the only center west of the Rockies.

In 2025, you can expect to see exciting new opportunities to collaborate and share your vision for this new season at the HIPRC. Join us for the HIPRC Speaker & Education Series which brings leading researchers, advocates, practitioners, and community leaders to the HIPRC to share their innovative work and build collaborations. Thank you to the UW School of Medicine, Harborview Medical Center, the School of Social Work, and all of the other departments and schools in the UW Health Sciences that support the ongoing work of the Center. We thank each of you for your contributions to ending suffering from injury and violence. Please reach out if you would like support or collaboration for your injury-related work! For more information on these and other exciting happenings and how to join, email [hiprc@uw.edu](mailto:hiprc@uw.edu).

**Thanks to everyone who has contributed to the research, outreach, training and education highlighted in this report**—I am honored to be part of such a committed and inspired community of injury prevention champions!

Sincerely,

A handwritten signature in cursive script that reads "Megan Moore". The ink is dark and the signature is fluid and personal.

**Megan Moore, PhD, MSW**

# About the HIPRC

**HARBORVIEW**  
INJURY PREVENTION  
& RESEARCH CENTER

UNIVERSITY of WASHINGTON

**Founded in 1987** by pediatricians Drs. Frederick Rivara and Abraham B. Bergman and surgeons Drs. Ronald Maier and Clifford Herman, the University of Washington (UW) Harborview Injury Prevention & Research Center (HIPRC) was one of original four **Centers for Disease Control and Prevention (CDC) Injury Control Research Centers**.

For 38 years, the HIPRC has conducted rigorous research in injury prevention, injury care, and the public health consequences of violence. Our Center is a leader in interdisciplinary, socially diverse, and inclusive training of public health professionals and has trained over 150 injury control researchers, most who work in academic settings.

The HIPRC's work results in effective policy, drives public health practice, and leads to transformational changes in the way we

provide health care to injured patients. The Center collaborates locally, regionally, nationally, and internationally with other leading institutions and organizations dedicated to the same goals.

Through partnerships, community engagement, and groundbreaking research, the HIPRC continues to shape policy, enhance public health practices, and train the next generation of leaders dedicated to injury prevention and care.

Featured: (Above) Dr. Megan Moore sits alongside other Injury Control Research Centers (ICRCs) at the [2024 Society for Advancement of Violence and Injury Research \(SAVIR\)](#) conference hosted by the Injury Prevention Research Center at the University of North Carolina at Chapel Hill.

## HEALTH EQUITY

### Our Mission

To reduce the impact of injury & violence on people's lives.

### Our Vision

To achieve health equity through interdisciplinary research, training, education, & public awareness.

### Our commitment to Health Equity in Injury.

Injury-Related Health Equity Across the Lifespan (iHeal) is the first initiative of its kind to leverage existing partnerships and build new coalitions to collaborate on the national agenda for health equity. We continue to expand our work toward measurable, large-scale, and sustained impact in reducing injury and violence. iHeal efforts are integral to shaping the HIPRC's center-wide activities addressing health equity across the lifespan.

### Together, we have the power to prevent injury and violence.

The HIPRC is committed to creating a respectful workspace as we seek to identify and correct structural biases that perpetuate inequities in health and well-being. We aim to dismantle biases based on age, disability, religion, ethnicity and race, social class, sexual orientation, indigenous group membership, national origin, gender identity, and linguistic differences. *Join us!*

# Administration

## Core *Achievements*:

The **HIPRC Administrative Core** provides an infrastructure and communication network that supports the Center's mission and goals, while integrating all Center functions. The Core provides oversight and ensures equitable strategic, academic, and fiscal responsibility and accountability for all Center activities and strives to be an active and interactive nexus for all who support the Center's work. The Core continuously works to ensure sustainability, growth, flexibility, and impact by expanding, strengthening, and diversifying partnerships.

## Core *Highlights*:

### CDC awards \$4.3M to UW HIPRC for Injury Prevention Research >>

The HIPRC has received a **\$4.3 million grant** from the CDC [to advance research addressing critical public health challenges](#). The funding will support research on opioid overdose prevention, adverse child experiences, school violence prevention, and older adult falls.

The grant will also support investigators conducting research, training of new injury-prevention specialists, and community-guided policies, programs, and public outreach.

## OUR CENTER'S SIGNATURE CDC PROJECTS:

### Ongoing Now Years 1-3:

► **Promoting Prevention and Resilience from Adverse Childhood Experiences in Tribal Communities Through Culturally Responsive Brief Behavioral Parent Training**

- Study Team:
  - M. Kuhn, PhD (PI)
  - K. Gillenwater, MD, MPH
  - J. Graves, PhD, MPH
  - E. Schoenfelder-Gonzalez, PhD

► **Increasing Access to Harm Reduction in Rural Primary Care to Prevent Overdose**

- Study Team:
  - B. Blanchard, PhD (PI)
  - J. Graves, PhD, MPH
  - J. Fortney, PhD
  - S. Tong, MD, MPH
  - S. E. Collins, PhD

### Starting Year 3:

► **Increasing Access to Harm Reduction in Rural Primary Care to Prevent Overdose**

► **Cultural Adaption of Remotely Delivered Enhance Fitness for Falls Prevention Among Rural American Indian Older Adults**

**Centers for Disease Control and Prevention**  
National Center for Injury Prevention and Control

**Featured: (Above)** Members of HIPRC Administrative Core: (Left to Right) Genelyn Garma, Alexandra de Leon, Dr. Megan Moore, Dr. Kushang Patel, Christine Shinakov

## Core *Highlights*:

### CDC Summer Interns >>

HIPRC Trainees, **Shoshana Benjamin, MPH** and **Matthew Frank, MSW, MPH**, were selected for a [summer internship](#) with the National Center for Injury Prevention and Control (CDC).

Benjamin's project was titled 'Science Data to Action in Violence Prevention Internship', and was mentored by Denise D'Angelo.

Frank's project was titled 'Access to Overdose Resources in Tribal College Settings', and was mentored by, Agkley Verma and Michon Marbry.

### Dr. Abe Bergman honored with Medal of Merit >>

**Dr. Abe Bergman**, one of the HIPRC's founding directors, **was posthumously honored with Washington's Medal of Merit**. The award, [presented in a ceremony](#) at the Washington State Capitol by Governor Jay Inslee, Lieutenant Governor Denny Heck, and Chief Justice Steven C. González, recognized his significant contributions to public health, particularly in child advocacy and injury prevention. Dr. Bergman's career includes pioneering work in pediatrics and creating impactful policies that have improved the health and safety of children statewide and beyond. This prestigious recognition highlights his enduring legacy and dedication to public service through healthcare innovation and advocacy.

## savir

Society for Advancement of  
Violence and Injury Research

### 2024 SAVIR Award Recipients >>

Two HIPRC members were selected to receive honors at the [2024 Society for Advancement of Violence and Injury Research \(SAVIR\) Conference](#).

- **2024 Student Plenary Speaker: Hannah Scheuer, MSW, LICSW** (HIPRC Trainee). At the concluding ceremonies of the SAVIR 2024 conference, Scheuer delivered a plenary talk. She was paired with a SAVIR Board Member who supported her in developing and refining her presentation.
- **2024 Excellence in Violence & Injury Prevention Science Award: Frederick P. Rivara, MD, MPH** (HIPRC Faculty Member). This award recognized a mid-career to senior-level scientist whose leadership, research, and service led to important advancements in violence and injury prevention science.

*\*\* Congratulations \*\**

### 2024 CDC SUMMER INTERNS

# Research

## Core *Achievements:*

**The HIPRC Research Core** is dedicated to leading and supporting injury and violence prevention research. We join our communities in this endeavor, including the University of Washington, local, state, and regional partners, and colleagues across the country and around the world. Research spans the continuum of injury prevention and response. Our work includes epidemiological research to determine injury causes and risk factors. When injury occurs, we study the spectrum of acute, rehabilitation, and long-term recovery care in the hospital, home, and community. We are actively engaged in expanding our capacity in both innovative qualitative and quantitative approaches, as well as applying community-engaged and equity-informed research methods.

## Core *Highlights:*

### Nationwide Evaluation of Suicide Prevention Training Programs for Healthcare Professionals >>

This project is **a nationwide evaluation and comprehensive assessment of suicide prevention training programs for healthcare professionals.**

In June, the team presented the project and the early findings at the Society for Epidemiologic Research's Annual Meeting in Austin, Texas.

### Advancing Health Equity: A Framework for Public Health Researchers >>

**A new report published this year** in [the journal Injury Prevention](#) reviews "The Continuum of Health Equity Practice & Science," a framework designed to help public health researchers and practitioners focus on health equity. Developed through surveys and research reviews, the continuum outlines seven key steps for addressing systemic inequities such as identifying health disparities, engaging communities, and implementing equity-focused science.

This tool can help guide public health researchers and practitioners in conceptualizing and applying health equity strategies. It can also uncover gaps in current approaches, improve equity-focused methodologies, and enhance public health outcomes. The Continuum aims to make health equity clearer and more actionable for public health efforts. *This work was part of HIPRC trainee, Hannah Scheuer's, MSW, LICSW, summer 2023 internship with the CDC.*

Featured: Image shows Continuum of Health Equity Practice and Science. Created by HIPRC Trainee, [Hannah Scheuer, MSW, LICSW.](#)

## Core Highlights:

### Preventing Falls in Long-Term Care Facilities >>

**Older adults living in long-term care facilities (LTCFs) face a higher risk for falls than those living independently in the community.** As part of a CDC-funded research study, three papers were published this year in the journals, Injury Prevention and JAMDA. The [first paper](#) focuses on identifying evidence-based individual resident level interventions to foster a proactive approach to reducing fall risks. The [second paper](#) examines the evidence base for facility-specific fall prevention plans through collaboration with care teams and leveraging evidence-based strategies. The [third paper](#) identifies effective strategies for implementing evidence-based interventions in LTCFs. Together, these findings offer a robust framework for enhancing safety and care quality in long-term care settings. The studies also emphasize innovative fall prevention strategies in LTCFs and the need for system-wide interventions tailored to unique facility environments.

### EQUIP—Equity in Injury Prevention >>

In 2024, **King County, WA, faced a significant challenge with over 16,000 individuals experiencing homelessness** ([King County Regional Homeless Authority](#)), a population at heightened risk for traumatic injuries, including severe burns. To address this issue, a collaborative research project, led by HIPRC Burn Section Leader and UW Medicine Regional Burn Center director Barclay Stewart, MD, and Caitlin Orton, MPH, and the King County Regional Homelessness Authority aimed to evaluate burn injury prevention education tailored for people experiencing homelessness (PEH).

The newly developed prevention education resource, How to Safely Start a Fire, was consumer tested with PEH to assess for clarity, applicability, and utility using the Model System Knowledge Translation Center's Consumer Testing Toolkit and the Patient Education Materials Assessment Tool (PEMAT) standards. Community outreach workers helped the research team identify participants living in different areas within Seattle. *This work was conducted with the valuable support of 2024 HIPRC INISIGHT Summer Research Program Intern, Anna Hayashizaki.*

### Our Center's Newly Funded Projects >>

- **WA Vehicular Pursuits Project**, Frederick P. Rivara, MD, MPH (PI), Xinyao DeGrauw, MD, PhD, MPH, Wayne Smolinsky, EdD, MiT, Nick McGuire, MPH, aPHR. *Funded by the Office of Financial Management.*
- **Aggressive Driving in Washington State**, Steve Mooney, PhD, Xinyao DeGrauw, MD, PhD, MPH. *Funded by the Washington State Traffic Safety Commission.*
- **Assessment of Fall-related Injury Prevention Strategies in the Lummi Nation**, Kushang V. Patel, PhD, MPH (PI), Dakotah Lane, MD (Co-PI), Megan Moore, PhD, MSW, Elise Hoffman, MPH, Aspen Avery, MPH. *Funded by the UW Population Health Initiative Pilot Grant Program.*
- **Examining the Implementation and Impact of School Resource Officer Policy Reform in the United States**, Keith Hullenaar, PhD, MS (PI), Ariam O. Kiflemariam, BA, Alison Ryan, BA, MPH. *Funded by the Eunice Kennedy Shriver National Institute of Child Health and Human Development.*
- **Assessing for and Intervening upon Early Childhood Violence Exposure in Pediatric Primary Care**, Anna Bender, PhD, MSW (PI), Wayne Smolinsky, EdD, MiT. *Funded by the Eunice Kennedy Shriver National Institute of Child Health and Human Development.*

# Training & Education

## Core *Achievements*:

The **HIPRC Training & Education Core** supports skilled, insightful, diverse, and productive learners, researchers, and practitioners who have an interest in advancing the field of injury and violence prevention. The Core seeks to improve equity in training and education access among underrepresented populations.

In collaboration with the HIPRC's Research and Outreach Cores, the Training & Education Core strives to develop technically adept researchers who are responsive to community needs and priorities.

## Core *Highlights*:

### INSIGHT Programs: Empowering Students Nationwide >>

In 2024, the HIPRC's three INSIGHT Programs increased national engagement: the INSIGHT **Summer Research** Program's applicant pool had over 850 applicants, with 15 accepted interns. Our virtual, robust INSIGHT **High School** Program included 47 students. In addition, our virtual extension program, **INSIGHT REACH**, included over 270 students!

Collectively, the HIPRC's INSIGHT Programs are supported by the HIPRC faculty and staff, in addition to researchers and health professionals from within and outside the University of Washington who provide state-of-the-art training and education in areas of injury and violence prevention.

UNIVERSITY of WASHINGTON

HARBORVIEW  
INJURY PREVENTION & RESEARCH CENTER

INSIGHT Program

Featured: Image shows 2024 INSIGHT Summer Research Program Trainees.

## OUR 2024 INSIGHT PROGRAM INCLUDED:

### UNDERGRADUATE >>

- **858 Applicants**  
*from over 200 schools*
- **27% Applicants**  
*Underrepresented Minority (URM)*
- **28% Applicants**  
*First Generation*
- **28% Applicants**  
*First Generation*
- **15 Accepted Trainees**
- *Applicants from 45 U.S. States*

### HIGH SCHOOL >>

- **47 Participants**  
*from six U.S. states*
- **Seven Scholarships Awarded**
- **Two Community Partners:**
  - *foundry10: education research*
  - *AAA Washington*

### REACH >>

- **27 Participants**  
*from 21 U.S. states & across the globe*
- **30% Participants**  
*Underrepresented Minority (URM)*
- **37% Participants**  
*First Generation*
- *Participants from Over 20 Schools*

## Core Highlights:

### INSIGHT Alum Collabs w/ HIPRC to Promote Active Transportation Safety >>

**2023 INSIGHT High School Alum, William Xu**, collaborated with HIPRC researchers on a Transportation Safety Study to help highlight the number of bicycle and e-scooter related injuries in Seattle. Xu created [two facts sheets](#) using e-scooter and bicycle injury data from UW Medicine and Harborview Medical Center's Trauma Database. The fact sheets provide a brief overview of the injuries, hospital locations where patients were treated, PLUS preventative measures. The fact sheets were designed to help prevent injuries by educating the public on best practices and safety tips.

### T-32 Program >>

The Department of Pediatrics at the UW School of Medicine and the HIPRC Training & Education Core, **is proud to have the only National Institute of Child Health and Human Development (NICHD) funded Pediatric Injury T-32 Program**, which provides funding to train pediatric injury and violence prevention researchers. The HIPRC's 2024 T-32 Post-Doctoral Scholars include: **Krista Neumann**, *Social Determinants of Family Violence Outcomes*.

### 2024 HIPRC Dr. Frederick P. Rivara Endowment Awarded >>

The HIPRC awarded **Premgamon Kuntajak, MS, RN, AGPCNP-BC**, the [2024 Endowment](#) for her project titled, "Psychological Resilience among Older Adults following Mild-Moderate Traumatic Brain Injury (TBI): A Concurrent Explanatory Mixed Methods Study." This award provides resources to graduate students

and postdoctoral trainee investigators looking to conduct an injury-related project that will advance knowledge of injury prevention, treatment, or recovery and help with career advancement.

### YOUTH-Reach >>

The **Youth-Rural Education and Careers in Healthcare (Youth-REACH) Program**, developed by the HIPRC, **aims to empower rural youth in the WWAMI region for college and healthcare careers**. The program, which addresses educational gaps by providing scholarships for hands-on healthcare training, dedicated mentorship, career exploration opportunities, and community engagement will connect students with local healthcare networks. Youth-REACH offers rural students a pathway to explore healthcare careers, experience university life through virtual programs, and gain valuable insights into higher education and professional development. The program will kick off in 2025. *This work was supported in part by foundry10.*

Featured: (Top Left) 2023 INSIGHT High School Alumni, **William Xu**; (Top Right) HIPRC Trainee, **Hannah Scheuer, MSW, LICSW**, presents findings at SAVIR Conference; (Bottom Left) 2024 INSIGHT Summer Research Program Cohort at August 2024 Symposium; (Bottom Right) 2024 Dr. Frederick P. Rivara Endowment Recipient.

# Outreach

## Core *Achievements*:

The **HIPRC Outreach Core** focuses on innovative and effective communication, equity, and impact in injury and violence prevention. The Core collaborates with the HIPRC researchers and the Research and Training & Education Cores to support the translation of research to practice. Center researchers collaborate with policy experts and community partners to conduct and disseminate research findings that aim to prevent injuries and violence. Using best practices from health education, behavioral science, social marketing, and communication, we support research that is responsive to community injury and violence prevention priorities. In partnership with the Community Advisory Board, we respectfully collaborate with our community partners and are responsive to their priorities.

## Core *Highlights*:

### Equity in Aquatic Programming >>

The **HIPRC launched its Equity in Aquatic Programming Guide**, a **groundbreaking resource designed to address disparities in access to aquatic activities and drowning prevention programs**. Designed to support community organizations, the guide offers culturally relevant tools, including comprehensive instructions, case studies, and best practices, to develop inclusive and accessible programming for underrepresented populations.

This guide is the result of extensive research, interviews, and work from the Seattle Drowning Collaborative, a group comprised of the [UW HIPRC](#), [Public Health-Seattle & King County](#), [Seattle Children's](#), and [SPLASHForward](#). The Seattle Drowning Collaborative met with experts in the field of aquatic safety and inclusivity and designed this guide to be a valuable resource for aquatic program coordinators, educators, and policymakers. This initiative reflects HIPRC's commitment to advancing health equity and ensuring safety across all communities.

**FREE AQUATIC PROGRAMMING GUIDE**

### Shining Our Light on Youth Suicide Prevention >>

In honor of the [2024 National Injury Prevention Day \(NIPD\)](#), the **HIPRC and the UW Forefront Suicide Prevention Group shared a social media campaign highlighting suicide prevention resources for children and teens (ages 10-17)**.

The digital resource guide included frequently asked questions made by teens, free local and regional resources for teens, plus helpful information about mental health. The guide helps answer some of the most common questions that children and teens have about mental health and suicide, helping to break the silence and encourage open conversations.

Featured: (Bottom Left) Equity in Aquatic Programming Guide; (Top Right) 2024 National Injury Prevention Day Staff photos, HIPRC Staff & Faculty featured on right, UW Forefront on Bottom Left.

## Core Highlights:

### 3rd Annual Outreach Learning Series >>

The HIPRC's Outreach Core held its **third annual "Outreach Learning Series: Engaging High School Students in Injury & Violence Prevention Careers."** The event hosted about forty 11th-12th grade students and teachers from Rainier Beach and Franklin High School at the Harborview Research & Training Building Auditorium.

Various hands-on stations were set up for students to learn about different careers in injury and violence prevention. Students were given a mock crisis scenario and were taught the steps taken both pre-hospital and at a hospital and trauma center to manage and then rehabilitate a gunshot wound patient. The focus of the Learning Series Event was to introduce and teach high school students about potential careers in health care. This event provided a particular focus on careers that students might encounter at a Level 1 Trauma Center with an injury and violence prevention lens.

Featured: (From Left to Right) UW Emergency Medicine shows how to read X-Ray scans @ the Outreach Learning Series event; UW Rehab Medicine demonstrates adaptive technology & rehab steps for patients @ the Outreach Learning Series event; HIPRC Research Coordinator, [Karishama Vahora, MPH](#), and volunteer [Fatima](#), discussing pedestrian safety at the Des Moines Community Block Party; HIPRC Table at MINDFest; Federal Way Parks and Recreation Kids Day.

### Injury & Violence Prevention Events >>

**The HIPRC's Outreach Core collaborated with community partners to support several local safety and injury prevention initiatives over the summer** to help spread awareness about drowning & pedestrian safety.

We partnered with Harborview Medical Center's Outreach Team at the [City of Des Moines' Community Block Party](#). With a focus on pedestrian safety, we provided education and resources to families on how to stay safe while walking in and around busy streets. One of the highlights was our interactive pedestrian safety activity, where we quizzed children and their parents on injury violence prevention topics such as road safety rules.

The HIPRC proudly sponsored [MINDFest 2024](#) in Skagit Valley. The event held an inspiring, informative, and inclusive environment for community members to engage in meaningful dialogue about mental health. Its purpose was to connect individuals with essential resources and services to support their well-being. The HIPRC staff contributed by enhancing language accessibility and offering valuable resources and activities to attendees of all ages. Additionally, we joined Seattle Children's Hospital at the **Federal Way Parks and Recreation Kids Day** to distribute information to parents on drowning prevention and where to access life jackets in the community.

# Make a Gift

We appreciate your interest in making a gift to the HIPRC. Your donation supports our mission to reduce the impact of injury and violence on people's lives in the U.S. and globally. Donations can be made to the HIPRC through the University of Washington website at [together.uw.edu](https://together.uw.edu).

Together, we are dedicated to reducing injury & violence in people's lives – [learn more >>](#)

## Thank You for Your Support!

We are deeply grateful to all of our collaborators, especially our community partners and community advisory board for their support of our mission to reduce the impact of injury and violence in our communities. Together, we address complex issues to achieve health equity through interdisciplinary research, education, training and public awareness on the impact of injury and violence.
